## CHAT GPT DEMO

2023 OSEP LEADERSHIP AND PROJECT DIRECTORS' CONFERENCE

How should a non-profit be using GPT

Non-profits can use GPT (Generative Pre-training Transformer) models in a variety of ways to support their operations, programs, and outreach efforts. Here are some possible applications:

1. **Content Creation:** Non-profits often need to create a lot of content for their websites, newsletters, social media, and more. GPT models can help generate drafts for these types of content. While the output will likely require some editing to ensure it aligns with your organization's voice and messaging, it can save significant time and effort.
2. **Grant Writing:** Writing grant applications is a time-consuming process that requires a lot of skill. GPT models can help write initial drafts, help to formulate persuasive language, and provide suggestions for how to frame the non-profit's mission and programs.
3. **Communication Automation:** Many non-profits interact with supporters, volunteers, and beneficiaries on a regular basis. GPT models can be used to automate some of these communications. For example, they can be used to create personalized email updates, responses to frequently asked questions, or other forms of outreach.
4. **Data Analysis:** Some GPT models are capable of understanding and summarizing complex datasets. If your non-profit collects data (on program outcomes, for example), a GPT model could help analyze and summarize this data in a way that's easy for your team and your supporters to understand.
5. **Event Planning:** GPT can assist in generating ideas for fundraising events, planning agendas, creating promotional material, and more.
6. **Education and Training:** GPT can help develop educational material for training volunteers or educating the community about the cause you serve.
7. **Strategy and Planning:** GPT can be a useful tool to help come up with new strategies for fundraising, outreach, program development, and more.

FOR MINIMIZING BIAS**

**2023 OSEP LEADERSHIP AND PROJECT DIRECTORS' CONFERENCE**

# MOST IMPORTANTLY

Keep in mind that this is a tool that can assist in developing materials, strategies, and resources, but it does not replace the human element in how to best do anything, including reaching out to particular communities or persons and eliminating bias in doing so.

# THANK YOU
