Exhibits from the 40th Annual Report to Congress Regarding Trends in the Data about Infants and Toddlers birth through age-2 served under IDEA, Part C

Exhibit 2. Percentage of the population birth through age 2 served under IDEA, Part C, by year and age group: Fall 2007 through fall 2016

NOTE: Percentage was calculated by dividing the number of infants and toddlers in the age group served under IDEA, Part C, on the state-designated data collection date in the year by the estimated U.S. resident population in the age group for that year, then multiplying the result by 100.

Exhibit 5. Percentage of infants and toddlers birth through age 2 served under IDEA, Part C, by primary early intervention service setting: Fall 2016

*a Home refers to the principal residence of the eligible child’s family or caregivers.

*b Community-based setting refers to settings in which children without disabilities are usually found. The community-based settings include, but are not limited to, child care centers (including family day care), preschools, regular nursery schools, early childhood centers, libraries, grocery stores, parks, restaurants, and community centers (e.g., YMCA, Boys and Girls Clubs).

*c Other setting refers to settings other than home or community-based setting in which early intervention services are provided. These include, but are not limited to, services provided in a hospital, residential facility, clinic, and early intervention center/class for children with disabilities. Additionally, this category should be used if the only services provided were to a family member; counseling, family training, and home visits are examples of such services.

NOTE: Percentage was calculated by dividing the number of infants and toddlers birth through age 2 served under IDEA, Part C, in the primary service setting on the state-designated data collection date by the total number of infants and toddlers birth through age 2 served under IDEA, Part C, in all the primary service settings on the state-designated data collection date (372,896), then multiplying the result by 100. Due to rounding, it may not be possible to reproduce the value presented in the exhibit from the sum of the percentages associated with the individual categories.

Exhibit 7. Percentage of infants and toddlers birth through age 2 served under IDEA, Part C, by exiting status: 2015–16

*a The Part B eligibility not determined category comprises children who were referred for Part B evaluation at the time they were eligible to exit Part C, but for whom the Part B eligibility determination had not yet been made or reported, and children for whom parents did not consent to transition planning.

*b “Other exiting categories” includes not eligible for Part B, exit with no referrals (3.4 percent); deceased (0.3 percent); and moved out of state (4.1 percent).

NOTE: The U.S. Department of Education collects Part C data on 10 categories of exiting: five categories that speak to Part B eligibility (i.e., Part B eligible, exiting Part C; Part B eligible, continuing in Part C; not eligible for Part B, exit with referrals to other programs; not eligible for Part B, exit with no referrals; and Part B eligibility not determined) and five categories that do not speak to Part B eligibility (i.e., no longer eligible for Part C prior to reaching age 3, deceased, moved out of state, withdrawal by parent or guardian, and attempts to contact unsuccessful). The 10 categories are mutually exclusive. Part B eligibility status refers to eligibility for Part B preschool services under section 619 (Preschool Grants program) of IDEA. Percentage was calculated by dividing the number of infants and toddlers birth through age 2 served under IDEA, Part C, in the exiting category by the total number of infants and toddlers birth through age 2 served under IDEA, Part C, in all the exiting categories (326,433), then multiplying the result by 100. Data are from a cumulative 12-month reporting period, which may have varied from state to state.

Exhibit 23. Percentage of the population ages 6 through 21 served under IDEA, Part B, reported under the category of autism, by year and age group: Fall 2007 through fall 2016

NOTE: Percentage was calculated by dividing the number of students in the age group served under IDEA, Part B, reported under the category of autism in the year by the estimated U.S. resident population in the age group for that year, then multiplying the result by 100. This graph is scaled to demonstrate the change in the percentage of the population represented by students reported under the category of autism. The slope cannot be compared with the slopes of exhibits 24 and 25.

SOURCE: U.S. Department of Education, ED Facts Data Warehouse (EDW), OMB #1875-0240: “IDEA Part B Child Count and Educational Environments Collection,” 2007–16. These data are for the 50 states, DC, and BIE schools with the following exceptions. For 2007 and 2008, data for Vermont were not available. For 2010 and 2014, data for Wyoming were not available. For 2011 and 2013, data for BIE schools were not available. For 2016, data for Wisconsin were not available. U.S. Department of Commerce, U.S. Census Bureau. “Intercensal Estimates of the Resident Population by Single Year of Age and Sex for States and the United States: April 1, 2000 to July 1, 2016,” 2007–16. These data are for the 50 states and DC with the following exceptions. For 2007 and 2008, data for Vermont were excluded. For 2010 and 2014, data for Wyoming were excluded. For 2016, data for Wisconsin were excluded. Students served through BIE schools are included in the population estimates of the individual states in which they reside. Data for 2007 through 2010 were accessed spring 2012. Data for 2011 were accessed fall 2012. Data for 2012 were accessed fall 2013. Data for 2013 were accessed fall 2014. Data for 2014 were accessed fall 2015. Data for 2015 were accessed fall 2016. Data for 2016 were accessed fall 2017. For actual IDEA data used, go to https://www2.ed.gov/programs/osepidea/618-data/state-level-data-files/index.html.
Exhibit 24. Percentage of the population ages 6 through 21 served under IDEA, Part B, reported under the category of *other health impairment*, by year and age group: Fall 2007 through fall 2016

NOTE: Percentage was calculated by dividing the number of students in the age group served under IDEA, Part B, reported under the category of *other health impairment* in the year by the estimated U.S. resident population in the age group for that year, then multiplying the result by 100. This graph is scaled to demonstrate the change in the percentage of the population represented by students reported under the category of *other health impairment*. The slope cannot be compared with the slopes of exhibits 23 and 25.

Exhibit 25. Percentage of the population ages 6 through 21 served under IDEA, Part B, reported under the category of specific learning disability, by year and age group: Fall 2007 through fall 2016

NOTE: Percentage was calculated by dividing the number of students in the age group served under IDEA, Part B, reported under the category of specific learning disability in the year by the estimated U.S. resident population in the age group for that year, then multiplying the result by 100. This graph is scaled to demonstrate the change in the percentage of the population represented by students reported under the category of specific learning disability. The slope cannot be compared with the slopes of exhibits 23 and 24.

<sup>†</sup> Not applicable.
<sup>a</sup> Child count is the number of children ages 3 through 5 served under IDEA, Part B, in the racial/ethnic group(s). Data on race/ethnicity were suppressed for 104 children served under Part B in four states; the total number of children served under Part B in each racial/ethnic group for which some data were suppressed in each of these states was estimated by distributing the unallocated count for each state equally to the race/ethnicity categories that were suppressed. Due to rounding, the sum of the counts for the racial/ethnic groups may not equal the total for all racial/ethnic groups.
<sup>b</sup> Children served through BIE schools are included in the population estimates of the individual states in which they reside.
<sup>c</sup> Percentage of the population served may be referred to as the risk index. It was calculated by dividing the number of children ages 3 through 5 served under IDEA, Part B, in the racial/ethnic group by the estimated U.S. resident population ages 3 through 5 in the racial/ethnic group, then multiplying the result by 100.
<sup>d</sup> Risk index for all other racial/ethnic groups combined (i.e., children who are not in the racial/ethnic group of interest) was calculated by dividing the number of children ages 3 through 5 served under IDEA, Part B, in all of the other racial/ethnic groups by the estimated U.S. resident population ages 3 through 5 in all of the other racial/ethnic groups, then multiplying the result by 100.
<sup>e</sup> Risk ratio compares the proportion of a particular racial/ethnic group served under IDEA, Part B, to the proportion served among the other racial/ethnic groups combined. For example, if racial/ethnic group X has a risk ratio of 2 for receipt of special education services, then that group’s likelihood of receiving special education services is twice as great as for all of the other racial/ethnic groups combined. Risk ratio was calculated by dividing the risk index for the racial/ethnic group by the risk index for all the other racial/ethnic groups combined. Due to rounding, it may not be possible to calculate the risk ratio from the values presented in the exhibit.

Example of 10-year Comparison at the State-level

**Exhibit 52. Percentage of the population birth through age 2 served under IDEA, Part C, by year and state: Fall 2008 and fall 2016**

<table>
<thead>
<tr>

<tr>
<td>Alaska</td>
<td>1.9</td>
<td>2.6</td>
<td>41.9</td>
</tr>
<tr>
<td>Arizona</td>
<td>2.0</td>
<td>2.1</td>
<td>4.6</td>
</tr>
<tr>
<td>Arkansas</td>
<td>2.4</td>
<td>1.5</td>
<td>-37.3</td>
</tr>
</tbody>
</table>

<sup>a</sup>Percent change was calculated for each state and “All states” by subtracting the percentage for 2008 from the percentage for 2016, dividing the difference by the percentage for 2008, and then multiplying the result by 100. Due to rounding, it may not be possible to reproduce the percent change from the values presented in the exhibit.

NOTE: Percentage for each state was calculated by dividing the number of infants and toddlers birth through age 2 served under IDEA, Part C, by the state on the state-designated data collection date for the year by the estimated U.S. resident population birth through age 2 in the state for that year, then multiplying the result by 100. Percentage for “All states” was calculated for all states with available data by dividing the number of infants and toddlers birth through age 2 served under IDEA, Part C, by all states on the state-designated data collection date for the year by the estimated U.S. resident population birth through age 2 in all states for that year, then multiplying the result by 100.
