

PDP: Cross-Project Collaboration

The Personnel Development Program (PDP) is intended to help address State-identified needs for personnel –in special education, related services, early intervention, and regular education– to work with children with disabilities; and ensure those personnel have the knowledge and skills to use evidence-based practices and improve results.

For the upcoming 2020-2021 academic year, PDP is supporting cross-project collaboration for faculty and scholars in the PDP Community as a means to:

- Share resources and information across projects
- Learn innovative approaches being used in projects
- Address emerging issues, needs, and opportunities
- Engage in cross-project collaboration with colleagues
